

GEZHI Series Mini 1x8 fiber optic switch connects optical channels by redirecting an incoming optical signal into a selected output fiber. This is achieved by using a patent pending opto-mechanical ...

The optical switch module has an input and output optical fiber bundle, and the optical fiber diameter is .0.9mm. The input fiber (public fiber) is marked with the 0 mark, and the output fiber is marked with ...

This 1x8 fiber optic switch is an ideal component for OADM,OXC,system monitoring and protection. With compact package, 1x8 mechanical optical switch can be easy to integrate into a high density optical ...

1X8 Fiber Optical Switches (single mode,multimode,850/1300nm,1310/1550nm)is a kind of 1 input and 8 output fibers optical path control device.

The component makes an opticalconnection between an optical port and either one of 8 input or output line. The highly reliable switching mechanism use integrated micromirrors and feautre below 1ms ...

ACP's MS Series switch connects optical channels by redirecting an incoming optical signal into a selected output fiber. This is achieved using a patent pending opto-mechanical proprietary ...

CrystaLatch™ 1x8 Series fiber optical switch connects optical channels by an incoming optical signal into a selected output fiber. This is using patented non-mechanical configurations and activated via ...

1x8 Solid-State Fiberoptic Switch connects optical channels by redirecting an incoming optical signal into a selected output fiber. This is achieved using patented non-mechanical configurations and activated ...

The CL Series 1x8 fiber optic switch connects optical channels by redirecting an incoming optical signal into a selected output fiber. This is achieved using our patented non-mechanical configurations and ...

1X8 Fiber Optical Switch (A Type) connects optical channels by redirecting an incoming optical signal into a selected output fiber.1X8 Opto-Mechanical Optical ...

DiCon's Multi-Mode MEMS 1x8 Optical Switch provides channel selection between a single input fi ber and 8 output fi bers. At the core of the switch is DiCon's proprietary MEMS chip; an electrostati-cally ...

The JDSU SC 1x8 Series SC Fiber Optic Switch (SC1C10081+27F00FA) is a programmable rack-mount optical switch that routes signals from one input port to any of eight output ports. Built on expanded ...
