

Omega Optical is your trusted partner for end-point plasma monitoring in harsh environments. Our ultra-narrow filters, high reflectivity and durability mirrors, and tailored diffraction gratings provide the ...

In this research, we design an optical contactless monitor module based on the MW plasma process for packaging. When the plasma is operating, a glow is generate.

The present invention belongs to the technical field of clothing treatment equipment, and in particular, relates to a clothing treatment equipment with sterilization and deodorization functions,...

For plasma and optical emission spectroscopy, Avantes provides two preconfigured instrument bundles: a four-channel system and an ultra-high-resolution eight-channel setup, perfect for desktop or rack ...

Optical access to plasma directly from blood for in-line integration AcouPlasmaOpt. cal enables rapid optical access to plasma in a miniaturized device. The technology uses gentle acoustic forces in ...

The SCALE CPO solution uses both coarse and dense wavelength-division multiplexing (CWDM and DWDM) for bi-directional data transmission over each optical fiber, delivering significant ...

MALTA, N.Y., May 4, 2026 - GlobalFoundries (Nasdaq: GFS) (GF) today announced the introduction of its SCALE(TM) optical module solution for co-packaged optics (CPO). GF's SCALE solution, or Silicon ...

Table I provides a schematic categorization of various plasma-optical processes without pretending anything like completeness. Illustrative examples are provided in Figs. 1 - 3 for a grating, ...

In this study, we display a novel method for all-optical switching and optical modulation by the plasma channel generated in the MoS₂ suspension. First, we synthesize MoS₂ nanosheets ...
