

The TKS-CAL kits are used to manually calibrate power meters as well as verify light sources, attenuators and OTDRs without causing any downtime and costly shipping.

SimpliFiber Pro Optical Power Meter and Fiber Test Kits include all the tools necessary to verify and troubleshoot optical fiber cabling systems, measure loss and power levels, and inspect and clean ...

This is a testing setup developed by NIST to calibrate optical power meters using either collimated-beam or connectorized-fiber configurations. This calibration system uses tunable laser diodes which ...

Custom-Cal also offers on-site Optical Power Meter calibration service and expedited services to meet the needs of our customers. The instruments listed below are a sample of what we calibrate and can ...

We can calibrate your free-space Optical Power Meter or Radiometer to ISO9001 or ISO/ IEC 17025. We check the cleanliness of the optical detector. If we find a performance problem with the received ...

Calibration, inspection, cleaning, and/or repair may be available for the ODM Fiber/Miller TTK 580 SM / MM Inspection & OPM Testing Kit. Click to inquire about our calibration or other services.

These kits are ideal for those who are new to optical measurements and who need simple measurement tools. All kits include SP-3 and M-SP-3 mounting posts and BPH-3 slotted-base post holder.

All of the sensors on this page come with a manufacturer calibration by default, but we also offer an ISO 17025 accredited calibration for some items. For more information on calibration options, please see ...

Our optical power meters feature built-in calibration factors for different sensor types and enable you to perform high-speed logging, relative power measurements, and absolute power validation with SCPI ...

The EXFO TKS-CAL is a high-accuracy calibration kit for optical power meters and light sources. It ensures traceable measurements with NIST standards, providing reliable reference power levels for ...
