

Roam's MTC#174; 6220-series of outdoor cabinets offer up to 10U worth of temperature-controlled space. Advanced thermo-electric temperature control technology. Fully insulated and NEMA 4R rated ...

Convection is the most common method to control the internal temperature of an enclosure. Natural convection is caused by hot air rising resulting in natural air circulation while forced convection uses ...

This guide will discuss why outdoor cabinet cooling has become a necessity, the technologies that are availed and the selection criteria that are critical, and how strategic decisions ...

Actively cooled, temperature-controlled heat exchanger, air conditioner, and filter fan cooling options. The Boxer 10 outdoor cabinets are NEMA 4 rated and GR-487 compliant.

GL has designed climate controlled outdoor cabinets that house sophisticated electronic equipment, such as computers and servers consisting of ...

Select the right Outdoor Cabinet Heat Exchanger by matching cooling capacity, durability, and efficiency to your cabinet's heat load and environment.

GL has designed climate controlled outdoor cabinets that house sophisticated electronic equipment, such as computers and servers consisting of microprocessors, fiber optic devices, Ethernet routers ...

The Air Conditioning Type Cooling System delivers precise, high-efficiency, and fully sealed temperature control for mission-critical outdoor and industrial enclosures.

This document discusses the physics behind outdoor cabinet thermal management, provides comparisons among passive and active cooling solutions, and offers a methodology for selecting the ...

EXAIR Cabinet Coolers are rugged industrial cooling systems designed to keep electrical and electronic control panels cool, clean, and reliable in hot or harsh environments.

At AZE Telecom, we specialize in designing and manufacturing robust climate control solutions to ensure your outdoor cabinets operate reliably, no matter the environment.
