

OZ Optics Limited is a leading worldwide supplier of fiber optic products for existing and next-generation optical networks.

Established in 1985, OZ Optics is a leading worldwide supplier of fiber optic components, test equipment and sensors. OZ Optics manufactures its products in three locations, Ottawa (Canada), Izmir ...

OZ Optics Limited, a leading global provider of fiber optic solutions, is proud to announce its new line of fiber optic coils designed and manufactured in Ottawa, Canada for use in optical gyroscopes and ...

OZ Optics is a leading supplier of standard and custom fibre optic components, sensor systems, and laser modules operating between 375 and 1625 nm. OZ Optics products are used by a broad range ...

Designed for practical use in fiber optic assembly, quality control, network installation, component diagnostics, education, and general power measurements, the unit promotes ease of ...

OZ Optics was the first company to introduce polarization maintaining fiber optic components, test equipment and visual fault locators to the marketplace, and it was also the first company to integrate ...

Located in Canada's capital city of Ottawa and established in 1985, OZ Optics Limited is a leading worldwide supplier of fiber optic products for existing and next-generation optical networks.

OZ Optics continues its leadership role in polarization maintaining components, fiber optic sensors and test equipment. The company is also well known for its custom design work.

Through webinars, videos, white papers, public presentations and public policy advocacy, the organization provides information on the use of fiber optic sensing to secure critical facilities, ...

Digital Fiber Optic Sensor FS-V30 series What is a Fiber Optic Sensor? A fiber optic sensor is an instrument that measures light from an LED (or other device) for detection purposes. These devices ...
