

Digitally transform your switchgear with Eaton's Magnum™ circuit breakers with Power Xpert™ Release (PXR) trip units for a more connected, reliable and safe system. The Magnum low-voltage ...

View online or download Eaton Power Xpert PXR 20 User Manual, Manual.

An external Communications Adapter Module (CAM) allows remote breaker operation. Auxiliary power at 24VDC provides full functionality even when the breaker is open or under light load.

The current protection functions do not require any external control voltage. The PXR trip unit consists of a micro-controller module that performs rms current measurements as well as calculations for the ...

The PXR trip unit consists of two modules, the frame module and the control module. The control module contains a microcontroller that performs true RMS current sensing measurements and ...

The PXR 25 system requires that an Eaton External PT Module must be installed in the switchgear enclosure. The External PT Module must be wired up to the Eaton cassette breaker secondary ...

The information, recommendations, descriptions, and safety notations in this document are based on Eaton Corporation's ("Eaton") experience and judgment and may not cover all contingencies. If ...

April 2022 Supersedes December 2019 Time current curves Power Defense MCCB Frame 2 thermal-magnetic and PXR electronic trip units Standards: UL, CSA, IEC, CCC Contents Description Page ...

The 18-6 7kA peak curves apply to UL 489 Switchboard Protective Series NRX breakers with the instantaneous asymmetrical peak value of 22.5 times the frame current rating.

This is a low-voltage signal, high quality gold contact required, max length 3 meters (15 feet). 0v/C/AGND (TC-2) Connect directly to selected CAM module. Use 2x twisted pair cable w/ shield and ...
