

Supplying electricity to homes and businesses across New Zealand involves three key elements: generating electricity, transporting electricity to distribution companies, and then selling it to customers.

Electricity Generation Electricity Transmission Electricity Retail Chronology of New Zealand Electricity Reform State-owned enterprise Transpower owns and operates New Zealand's national electricity transmission system. The system includes substations, high voltage cables, transformers and overhead lines for transmitting high voltage electricity from power stations to distribution (lines) companies. See more on [mbie.govt.nz](#).
