

From industrial cable management systems to office environments, houses of worship, and even performance venues, you can use the cable tray Revit families available through BIMsmith Market to ...

How do I change the colors of the cable trays / cable trunking in Revit? Let's say I have submain cable trays, ELV trunking, and other types of electrical trays, and I want to change their ...

You would need to assign a material to the cable tray or create a selection set in Navisworks. Navisworks only looks for materials, not filters or system overrides.

Share and download revit families, ask questions and share ideas in our forum and learn from our tutorials

Add view filters for the different cable trays -> Add the filter in the view -> Set the surface pattern as Solid Fill and set the color. Also the question is, how do you change the color of a model in Revit?

So I created one and had it select Cable Tray and Cable Tray fittings as the selected categories to show in the filter. Changed the line colour to Red and all the trays and fittings changed to Red in my plan.

Changing the color of a cable tray in Revit requires a systematic approach to modify the appearance of the element within the project. Below are detailed steps to adjust the color settings effectively.

Download free BIM objects of Niedax Group for SketchUp, Autodesk, Revit, Vectorworks or ArchiCAD.

A color can be applied to an Ionic component in order to change the default colors using the color attribute. Notice in the buttons below that the text and background changes based on the color set.

Download free BIM objects from over 2 000 manufacturers. Choose among BIM objects for SketchUp, Autodesk, Revit, Vectorworks or ArchiCAD.

You could simply only Edit Family >> Save As and then Load the Elbow Family which you require into your project. You'll notice that there are a couple of additional fittings included, as ...
