

Easy to use with no electrician required, the ST Switch is a do-it-yourself smart ...

ST's portfolio of interfaces includes standard interfaces (such as RS-232, RS-422, RS-423, RS-485, LVDS, and USB), I/O expanders, level translators, application-specific interfaces for smart cards and ...

ST's portfolio of interfaces includes standard interfaces (such as RS-232, RS-422, RS-423, RS-485, LVDS, and USB), I/O expanders, level translators and application-specific interfaces for smart cards ...

ST's new programmable switches feature extensive built-in protection and diagnostics, which enhance safety and reliability by handling undervoltage, overvoltage, overload, short circuit, ...

These devices integrate the control section (logic interface, drivers, diagnostic and protection features) and the power stage on the same chip, with benefits in terms of compactness, increased system ...

Order Switches and Multiplexers direct from STMicroelectronics official eStore. Prices and availability in real-time, fast shipping. Find the right Switches and Multiplexers for your next design.

Our analog switch IC portfolio ranges from SPDT switches to larger octal SPDT or quad DPDT switches. It features low on-resistances, integrated 15 kV protection diodes and negative charge pump, and ...

Prices and availability in real-time, fast shipping. Find the right Interfaces and Transceivers for your next design.

To cater to your design needs, Future Electronics stock more than 5000 switch models giving you more option to choose from. From dip switches, encoder switches, and pushbutton switches to rocker ...

Easy to use with no electrician required, the ST Switch is a do-it-yourself smart portable automatic transfer switch that automatically transfers utility power to power from your portable generator.

ST's portfolio of switches and high voltage multiplexers include analog, data signal switches, power load switches, high-voltage pulser ICs for applications such as audio, USB, video, LVDS, PCIe and ...
