

The Powersafe Sequential Mating Box is an electrical connection point for single pole connectors on three phase electric power up to 800 amps. The Powersafe Box has a sequential mating locking ...

The Powersafe Power Distribution Box is an electrical connection point for single pole connectors on three phase electric power up to 800 amps. The Powersafe Box has a sequential mating locking ...

The box utilises standard Powersafe Connectors in either drain or source. The power distribution box has mechanically keyed ports to ensure correct phase connection, the ports are lockable to prevent ...

A powerlock box is an electrical connection point that enable emergency power to be quickly and safely connected in the event of failure of the mains supply. The sequential power distribution box allows ...

The PowerLock Box ensures safe and efficient power distribution for industrial and event applications. Built for high performance and reliability.

The Phase 3 PowerSafe PD5-E Sequential Mating Box is the ultimate solution for safe and efficient temporary power distribution. Designed for high-performance applications, this 800A power box ...

The Powersafe Sequential Mating box is a three phase power distribution board designed for use with temporary electrical installations with a current rating of up to 800amps.

Power distribution box, ideal for the stage and events environment, supplied with PCE Midnight Series (Black) plugs and sockets with MCB Type C on the outgoing sockets.

The Phase 3 PowerSafe PD5-E Sequential Mating Box is the ultimate solution for safe and efficient temporary power distribution. Designed for high-performance ...
