Introduce: DB distribution cabinets are used in low voltage power networks, installed in electrical engineering rooms of floors in buildings, equipment clusters in factories and industrial workshops. ...

Our main products include prefabricated substations, high and low voltage switch cabinets, electrical distribution box, distribution and other electrical equipments, as well as solar ...

Through our real-time monitoring and smart control capabilities, integration of these distributed energy resources can be optimised while ensuring the reliability of our electricity network.

Our Distribution Boards are used for power receiving, feeding, metering and lighting in residential buildings. Like our Main Switchboards, the modular size makes it easy for customization.

As Singapore aims to diversify its energy mix, including solar and waste-to-energy projects, the demand for precision power distribution cabinets that support smart grid functionalities...

For a smart city project in Singapore, we delivered custom intelligent power distribution boxes designed to integrate remote monitoring and alert functions. The solution supports digital ...

Explore how precision power distribution cabinets with intelligent monitoring transform data center power management--from rack-level control to power quality analysis and zero ground ...

LKH Projects Distribution (LKHPD) is an established electrical solution provider in Southeast Asia since 1990, serving a broad spectrum of customer base. Our products and solutions comprise of Power ...

Designed with advanced protection mechanisms and smart monitoring capabilities, this solution enhances electrical safety, minimizes downtime, and optimizes energy efficiency in various applications.
