

FiberTech Optica delivers fiber optic bundles to meet almost any requirement. With virtually no limit on the number of fibers, all of our fiber optic bundles can be configured as spot, line, grid, hex, or ...

Fiber optic bundles often contain multiple different fiber types. Single mode fibers may be mixed with multimode fibers. They may include fibers optimized for different wavelengths, fibers of different core ...

OS1 single mode fiber optic cables are made with a single mode fiber core, which means that they have a very small core diameter of 9 microns. This allows the cables to transmit data over much longer ...

Discover a vast selection of single mode and multimode fiber optic cables, as well as bundled fiber optic cables, with customizable options for length, connectors, and jacketing.

Fiber optic bundle cable, also known as pigtail bundle, only has a connector at one end, while the other end is a fiber break. It is used to connect fiber optic cable to terminal equipment.

XSOF designs and manufactures high-performance fiber optic bundles and arrays tailored to your specific requirements. Our assemblies are composed of multiple optical fibers, providing enhanced ...

Single-mode optical fiber is extensively used in the construction of 5G networks, as well as in Fiber-to-the-Home (FTTH) solutions. It offers high transmission bandwidth and long-distance ...

End cap diameters and lengths are offered for select numerical apertures and fiber cores size but can be easily customized for a variety of fiber types and specialized applications. For the full range of design ...

Sumitomo Electric Lightwave's OS2 Single-Mode Fiber Bundles are designed for installation into the FutureFLEX®; Air-Blown Fiber®; tube cable infrastructure. They can be used in indoor and outdoor ...

Complementary to a single mode fiber bundle, a 2-D tapered fiber optic cable bundle uses a flat-bottom groove and lid to stack multiple fibers tightly together in a rectangular or circle arrangement.
