

Wide span cable trays, i.e. ladders such as troughs, are suitable for bridging large distances between supports. The load-bearing capacity of such “cable bridges” depends largely on the load-bearing ...

Large span cable trays are designed to support heavy cable loads across long distances without intermediate supports. Made from high-strength galvanized steel or stainless steel, these trays ...

Our high quality products include cable trunking, cable ladder, perforated cable tray, wire mesh cable tray, the matching accessories and switchgear cabinet, etc.

Different from normal cable trays, Large span cable tray has large supporting span with high loading capacities. Large span cable tray is assembled by pultruded FRP profiles.

Our wind certification report provides you with list of acceptable B-Line series cable tray supports, fittings and covers based off of the environmental conditions, cable loading, and type of cable tray in your ...

The flexible coupler provides easy installation without measuring and cutting cable tray side rails. Once installed, the coupler allows for electrical continuity, therefore eliminating the requirement for a ...

Loncin wire mesh cable tray is constructed of precision engineered, high quality, welded steel wire and is the result of decades of research gained from the installation of 94,000 miles of tray across the globe.

Cable trays - Cable trays, wide span.

Cable trays for industrial and marine use. Includes distribution trays, cable routes and NATO-type models. Request a quote directly via our webshop.
