

ZGZNSD20-F Intelligent SPD is a high-performance, high-intelligence surge protection product independently developed and produced by ZG, which can meet the requirements of high automation ...

Since its establishment, Zhongguang has always insisted on returning customers with high-quality products and high-level services.

The module protects against anti-plug and mutual insert. It is provided with overheat protection, failure indication and centralized remote signalling alarm dry contact.

Design engineers or buyers might want to check out various Surge Protector factory & manufacturers, who offer lots of related choices such as surge protective device, lightning arrester and surge arrester.

A prominent player in the lightning protection industry, Zhongguang specializes in high-quality SPDs for industrial, commercial, and residential applications. Their products are widely used in power ...

This series is used for primary and secondary surge protection. The 3+1 and 1+1 configurations are composed of MOV and GDT power module for L-N, N-PE protection respectively.

This surge module, manufactured by Zhongguang, is a crucial addition to any power supply system that requires high levels of protection against electrical transients.

Lightning Protection Bracket T-Type Expansion Lightning Protection Clamp Hot-Dip Galvanized Round Steel Lightning Protection Band Bracket with Pull-Out Lightning Protection Clamp New Product

It is a lightning protection device connected in series on the signal line, which is used to limit the transient overvoltage and shunt the surge current in the signal line.

Founded in the early 1987, Zhongguang is a renowned manufacturer specializing in lightning protection and surge suppression technologies. The company is known for its advanced R& D capabilities and ...
