

SIMABUS is an Extra high voltage range of clamps and connectors for AC & DC applications up to 500kV (phase -to -phase voltage). These products are designed to support and connect &#216;80 to ...

Tubular Busbars: Supported by column insulators (usually ceramic), these offer high mechanical strength and superior corona resistance. Stranded-Wire Busbars: Secured with dead-end clamps, ...

To connect various high voltage (HV) components to the HV system, we also deliver a wide variety of busbars. In cooperation with the customer, these can also feature our Bus Bar Insulation Tubing (BBIT).

Through our partnership we're able to offer a complete range of copper and aluminium high voltage power connectors. We are also able to offer Copper and Aluminium Tubular Busbars in a range of ...

Busbars are indispensable components of high-voltage power systems, ensuring efficient and safe power transmission. Selecting and utilizing ...

With aluminium solutions for electrical use, such as tubular conductors and flat wires, we can contribute and create new value for your business. An aluminium conductor, for example, weighs half as much ...

One of the signature products developed by Intercable Automotive Solutions are our custom made high-voltage busbars manufactured to client specifications. Busbars are essential components in electric ...

Busbars are indispensable components of high-voltage power systems, ensuring efficient and safe power transmission. Selecting and utilizing the right busbars contribute to enhanced system ...

Custom designed to fit your space constraints while providing distinct electrical benefits, including low inductance, minimal voltage drop and specified partial discharge level.

We flexibly manufacture suitable & safe busbars for your switchgear made of copper or aluminium. In addition to the realisation of complex shapes, we also take on the assembly work of the DC link rails. ...
