

The aggregation switch is not responding

The common reasons why a configured interface is not an active link in a port-channel are mentioned below: The interface status might not be connected. This can be confirmed by running the command ...

I have a DS920+ and a Netgear GS308T managed switch connected to a Synology RT6600ax router configured with several VLANs. I want the DS920+ to communicate with three VLANs - I can do that ...

For each Child Interface that is not "up up", follow the steps in the Resolution Guide - EX - Verify/Troubleshoot Physical Interface to troubleshoot and correct it.

I disconnected the port aggregation on the switch and did the link aggregation on the NAS but I don't really know if it's working and giving me increased speeds or not.

If the member port is down, check the physical port connection. Make sure the member is up. If conditions permit, replace other member ports, confirm whether the aggregation member port can be ...

This document describes how to troubleshoot Link Aggregation Control Protocol (LACP) on Nexus 9000 cloudscale family.

In some cases, restarting the aggregated interfaces or the device may resolve temporary issues. LACP and static LAG are pretty mature features. If you experience a problem with them, ...

Ensure the current firmware is active, and reboot the switch. Consult the logs, and grab what happens around the moment when the "LED stop flashing"; use an out-of-band connection for ...

The customer wanted 25G ports between his buildings and went with the pro aggregation switches and some SFP28 modules (ESR (300m)). The modules are detected but the link is not coming up.

This manual provides detailed instructions for the installation, operation, and maintenance of the Ubiquiti Networks UniFi Aggregation Switch, model USW-Aggregation.

The aggregation switch is not responding
