

No Armor, Toneable Flat Drop Cable, Dry/Gel, Zero Water Peak, Price Per Ft., Our reels have a manufacturing variance up to 5%, you will be billed for the quantity that ships.

Fiber Optic Cable Types Fiber optic cable is designed to transmit data using light signals instead of electricity, making it faster, more secure, and immune to electromagnetic interference compared to ...

The AFL TRIDENT™ connector provides quick and easy plug and play connections to the AFL TITAN RTD™; multipoint terminals, enabling fast service subscriber connections.

This single-tube cable features thixotropic gel-filled tubes protecting optical fibers, housed in a thermoplastic jacket with two embedded strength members for anti-buckling.

Our Surelight™ flat drop cable is a single-mode fiber with a rugged design for direct-buried, self-supporting aerial and duct installation. You can choose from several configurations to simplify ...

To construct the cable, up to 12 optical fibers are placed in a 2.0 mm gel-filled buffer tube (a 3.0 mm buffer tube for 24-fiber cable) to create a flexible and easy-to-access core.

The cable maintains excellent mechanical properties while being more flexible and easier to handle and install than metal armored cable--with no grounding or conduit required.

Flat fiber optic cable, slim and flexible design for easy installation, ideal for indoor and outdoor high-speed data transmission applications.

As a leading supplier of advanced fiber optic components, Molex has an extensive product offering that includes a full range of optical solutions from connectors, adapters and cables to backplanes and ...
