

Tweezers for holding ceramic ferrules

Tweezers with zirconium-toughened alumina ceramic, high precision tips are available. The advanced ceramic tip provides a superior combination of strength and hardness with low density.

Ceramic Tweezers, Stainless Steel Ceramic Tweezers, Non-Conductive, High Temperature Resistance 1500 Degrees Applicable to Precision Electrical Operation (Black, White pointed tip)

Explore our range and find the perfect pair of ceramic tip tweezers to meet your professional needs.

Excelta's cleanroom safe Ceramic Tipped tweezers feature replaceable ceramic heads. Zirconia ceramic is six times harder than stainless steel, non-magnetic and chemically inert.

Our non-conductive, heat-resistant tweezers allow you to safely remove hotspots & otherwise adjust your coils without the possibility of accidentally causing a short-circuit (As long as you only use the ...

These are a great pair of precision, heat-resistant tweezers. They've got a metal body and ceramic inset tips, so they are anti-magnetic and will not bend with use.

When it comes to Ceramic Tweezers, you can count on Grainger. Supplies and solutions for every industry, plus easy ordering, fast delivery and 24/7 customer support.

These precision zirconia ceramic tipped tweezers are useful for many applications where an anti-magnetic, non-conductive (both heat and electricity), and chemically resistant tweezer is needed. ...

Unlike metal tweezers, ceramic tweezers won't conduct electricity or magnetize, making them ideal for sensitive components and environments. Their durable, non-reactive surface prevents contamination ...

These tweezers are an indispensable tool for all vapers who prefer building their own coils! They are constructed out of stainless steel and feature heat-resistant pointed ceramic tips.
