

The 2x2F Bi-directional Fiber Optic Switch connects optical channels by redirecting 2 incoming optical signals into 2 output fibers. This is achieved using a opto-mechanical configuration and activated via ...

The NS Ultra-Fast Series (NF) fiber optical switch is based on our patented electro-optical configuration, featuring low optical loss, wide temperature

It comes with 8 copper cable transmission ports and 2 ports for multimode fiber optic. It provides simple and complex connectivity for multiple Ethernet device, network management, enhanced cyber ...

Discover fiber switches designed for reliable network connectivity. Browse 10G, 2.5G, and gigabit options to expand your bandwidth.

2X2 Optical Switch (single mode,multimode,Latching,Non-latching,850/1310/1550nm) consists of 2 input and 2 output fibers,a optical path control device.

This model has 2 of these ports available to your system in addition to the ...

?Up to 120km?: Fiber transceiver provides multiple Gigabit SFP ...

Our layer 2 fiber switches and aggregation devices are managed and can be remotely provisioned from our EMS system, allowing for fast deployment and instant connection to your IoT devices.

?Up to 120km?: Fiber transceiver provides multiple Gigabit SFP optical ports and 10/100/1000M adaptive RJ45 network ports, users can choose different SFP optical modules ...

To connect multiple Ethernet switches, the best way is to use a multi-strand fiber cable. The 4-strand pre-terminated fiber optic cable consists of four individual strands or fibers of glass or ...

This model has 2 of these ports available to your system in addition to the standard 8 copper ports. This switch is also extremely easy to mount and can handle most normal industrial environments with ease.

The switch connects optical channels using a proprietary electric-thermal activated micro-mirror, moving-in and -out optical paths, uniquely featuring high stability without long-term drift, fail-safe latching, fast ...
