

The 200G CPO technology enables scale-up domains to exceed 512 nodes while addressing the bandwidth, power, and latency challenges associated with the increasing size of next ...

To address power challenges in bandwidth scaling, Lumentum engineers presented a technical paper at OFC 2025 detailing results from new 200G-per-lane differential drive electro ...

Lumentum introduced new indium phosphide (InP) photonic chip technologies, including 400 Gbps-per-lane and 200 Gbps-per-lane optical links, along with ultra-high-power lasers for co ...

Lumentum's latest InP innovations -- enabling future 400 Gbps-per-lane optical links, more efficient 200 Gbps-per-lane optical links, and co-packaged optics -- will be showcased in live...

Coherent (NYSE: COHR) will demonstrate multiple co-packaged optics (CPO) technologies at OFC 2026 in Los Angeles on March 17, 2026. Presentations include a 6.4T ...

With this announcement, Nubis is also announcing the availability of its 200G per lane silicon photonics IC, Puma. This highly integrated Silicon Photonics device provides 16 integrated...

Read all comments on NVIDIA's Spectrum-X Ethernet Photonics Debuts as the World's First 200G Co-Packaged Optics, Supercharging the Future of AI

At OFC 2026, Coherent will show off several new breakthroughs in co-packaged optics. One highlight is a 6.4T (32x200G) socketed CPO built on silicon photonics, paired with Coherent's ...

Together, these technologies form an industry-leading comprehensive InP-enabled solution set spanning scale out, scale up as well as scale-across applications, with co-packaged ...

"We are pleased to collaborate with Nubis due to their groundbreaking, industry-leading 200G/lane CPO silicon photonics technology.

Read all comments on NVIDIA's Spectrum-X Ethernet Photonics Debuts as the World's First 200G Co-Packaged Optics, Supercharging the Future ...

Coherent (NYSE: COHR) will demonstrate multiple co-packaged optics (CPO) technologies at OFC 2026 in Los Angeles on March 17, 2026. ...
