

Learn how TE's high voltage insulators provide robust, light-weight support for pantographs, busbars and other high voltage electric equipment on locomotives, multiple units and high speed trains.

Busbar trunking systems, also known as busways, are modern electrical distribution solutions that use enclosed copper or aluminum conductors to efficiently transmit power from source ...

The Vertiv(TM) Powerbar busway system patented range of busbar trunking adds overhead power distribution to your data center, allowing increased accessibility to power loads for maintenance.

Manufactured to BS EN 61439-6, the IBAR range of power distribution busbar trunking system products has been developed to meet the growing and ever developing demands of the critical power industry. ...

A compact High Power Busbar Trunking configuration where conductors are tightly insulated and enclosed for enhanced safety and thermal control. Provides stable performance in high load ...

One of the signature products developed by Intercable Automotive Solutions are our custom made high-voltage busbars manufactured to client specifications. Busbars are essential components in electric ...

The Xtra-compact (XCP) busbar is a busbar trunking system ideal for the transport and distribution of energy in data centers. The high-power busbar ranges from 630-6300 amps with a smart and ultra ...

A busbar trunking system is a pre-assembled configuration housing flat-bar conductors (phase and neutral) within a single metallic enclosure feeder trunking systems, power tap-off is achieved via ...

Take advantage of the benefits of digitalization at every step of the project with the SIVACON 8PS busbar trunking systems - from planning to installation on up to operation.

The Vertiv(TM) Powerbar patented range of busbar trunking adds overhead power distribution to your data center, allowing increased accessibility to power loads for maintenance.
