

Weekends at VC We know that visiting a new church can be intimidating. We hope you'll find friendly people & experience God's presence at VC.

These demonstrations highlight Coherent's ability to support multiple optical architectures for co-packaged optics, leveraging its expertise across key photonics technologies including indium ...

The download includes the VC_Redist runtime packages for Visual C++ 2005, 2008, 2010, 2012, 2013, 2015, 2017, 2019, 2021 and 2022. Both 32-bit and 64-bit are supported.

Optical communication VCSELs from Sony Semiconductor Solutions Corporation (SSS) apply the characteristics of VCSELs which are capable of direct modulation with low power consumption, and ...

These components are required to run C++ applications that are developed using Visual Studio 2015 and link dynamically to Visual C++ libraries. These package can be used to run such applications on ...

VC MIPI Modules provides industry-grade MIPI CSI-2 camera interface drivers for a variety of embedded platforms. Our modular architecture ensures compatibility and ease of integration across different ...

VI Systems leverages its industry leading optical design technology to offer a wide a portfolio of Vertical-Cavity Surface-Emitting Laser (VCSEL) and Photo-Diode (PIN PD) components for the standard data ...

Microsoft Visual C++ Redistributables are essential runtime libraries for Windows applications to work properly. Visual Studio 2015, 2017, 2019, 2022 and 2026 all share the same v14 ...

Venture capital (VC) is a form of private equity financing provided by firms or funds to startup, early-stage, and emerging companies, that have been deemed to have high growth potential or that have ...

Vision Components develops machine vision technology focusing on embedded solutions. The product line includes MIPI camera modules, programmable multicore ARM/FPGA/Linux board cameras, as ...

When investing in a startup, VC funding is provided in exchange for equity in the company, and it isn't expected to be paid back on a planned schedule in the conventional sense, like a bank loan.

A venture capitalist (VC) is an investor who provides capital to startups and small businesses with perceived long-term growth potential.

The module enables light field, multiview, and multispectral imaging, capturing multiple perspectives or wavelengths simultaneously for 3D reconstruction, spectral analysis, and AI training.

freely programmable 3D camera systems for triangulation applications. Consultation and service are available to you worldwide through our local partners in over 30 countries. We operate sales offices ...

Vision Components specializes in smart Embedded Vision Systems, offering three main product categories: ultra-compact MIPI camera modules, ARM-based embedded cameras with integrated ...

A venture capitalist (VC) is an investor or investment partnership that provides young companies with capital in exchange for equity. Startups turn to VCs for funding to scale up their...
