

Manufactured in either aluminum (VBPA) or copper (VBPC), the VBP offers minimum phase spacing and is the most versatile for interrupter accessories. The intrinsic design offers stability under heavy ...

The switch ships from the factory fully adjusted with the linkage set in toggle in the closed and open positions. The switch stays in adjustment after installation, just as it was tested and operated at the ...

A Vertical Break Switch (VBS) is an essential part of a power plant that prevents power from being transmitted to the grid when there is a fault on a circuit, causing an outage to the system.

MindCore Technologies is a certified manufacturer of medium and high voltage disconnect switches, serving utilities and industries across North America and beyond.

Ideal for either substation or transmission applications, PASCOR switches are engineered to the highest standards to meet and often exceed all applicable ANSI and NEMA requirements. PASCOR ...

The AVX is a station class vertical break switch made with lightweight but high strength aluminum alloys combined with silver brazed copper contacts, that are easily replaceable should it ever be required.

Power & Utilities Utility Switching & Fusing Air Break Transmission Switches Vertical Vee Switch Unitized (AVRVU)

All the mechanical transmission components are accessible from outside the current path. There are no parts hidden inside the conductors. All parts are fabricated from extruded aluminum or machined ...

The VBV is a true "V" style vertical break switch. With a center of gravity within 5 % of its geometric center the VBV can be safely and securely mounted on a single beam unlike conventional vertical ...

V2-CA Aluminum Vertical Break Switch V2-CAV Aluminum Vertical Break - Inclined Jaw V2- C Copper Vertical Break V2-HC Copper Vertical Break - High Current
