

What is a longitudinal stripping tool for optical cables

Compact, lightweight & ergonomic tool with center feed design provides precise, longitudinal fiber stripping from the 900 micron buffer coating down to the 125 micron bare fiber

[EFFICIENT STRIPPING] With 5 stripping channels and an incisive blade, this fiber stripper provides neat and precise cuts. Its longitudinal cutting design is suitable for 1.9-3mm pipe ...

Fiber strippers such as our JIC-1022, Wire Stripper 10-22 AWG, are designed to cut and strip the most commonly used stranded and single pair wires from 10 to 22 AWG and 2 mm-3 mm fiber jackets. ...

Longitudinal Cable Sheath Slitter SI-01 Product description: Longitudinal Cable Sheath Slitter SI-01 for fiber optic cable stripping.

?Wide use?: This cable stripper can cut sheaths of various materials. Such as PVC, PE, steel armor sheath and non-metallic reinforced component fiber optic ...

A Fiber Optic Longitudinal Slitter is a precision-engineered mechanical device designed to slit the outer jacket of fiber optic cables along their longitudinal axis.

Learn how to use fiber strippers, cable cutting scissors, and armored cable slitters. Discover their applications in fiber splicing, cable prep, and FTTH.

Shop our fiber optic cable stripping tools, essential for removing cable jackets, aramid yarn, and buffers to ensure optimal fiber optic performance.

Optical fiber cable longitudinal slitter is an efficient and indispensable tool for fiber optic cable termination that can easily slit the PVC and PE cable jacket.

The Longitudinal 1A Stripper is an essential tool designed to strip the sheath longitudinally from around fibreflow microducts or other telecommunications-style cables without causing any damage to the fibre.

?Wide use?: This cable stripper can cut sheaths of various materials. Such as PVC, PE, steel armor sheath and non-metallic reinforced component fiber optic cable sheath, etc. Suitable for optical ...
