

XM power distribution box (hereinafter referred to as metering box) is suitable for use as metering device of AC 50HZ TN-C system (three-phase five-wire) with voltage of 220V.

XM1 ~ 2 series are economical switch distribution boxes, which can be installed with various miniature circuit breakers with modulus of 18mm and 86 type sockets.

Suitable for circuits with AC 50 Hz and rated voltage 220/380 V, it is used for controlling and distributing power to electrical equipment, and provides overload, overvoltage, short-circuit and earth leakage ...

The Xm-type distribution box is made of electrolytic steel plate, bent and welded, and its surface is treated with epoxy resin electrostatic spraying, making it aesthetically pleasing and durable.

XM Cabinet is widely used in lighting distribution systems of power station, transformer station, factory, mine, hotels, apartment, buildings, port, railway station, airport, warehouse, hotels etc.

It is suitable for terminal distribution in public buildings, residential buildings, and home decoration, and can also be used in power supply locations such as building lighting, distribution, and power. The ...

XM Series Low Voltage Distribution Box designed for safe and reliable power distribution in commercial and industrial electrical systems.

XM Distribution Box meets GB7251.1-2005 and GB7251.3-2006 standards, designed for 380V rated voltage with overload and short-circuit protection for industrial and commercial use.

The XM type distribution box is made of electrolytic steel plate bent and welded, and the surface is treated with epoxy resin electrostatic spraying, which is beautiful and durable.

XM lighting metering and distribution box is suitable for single-phase, three-wire or three-phase five-wire terminal circuits with rated voltage of 220V or 380V and total load current of single row of not more ...
