

The TO package devices are designed for telecom applications and offer high-speed transmission capabilities. They are compatible with various digital applications and come in different CWDM ...

High-performance 1550nm optical transmitters (Direct & External Modulated). Supports up to 100km+ with EDFA. Ideal for CATV trunk lines, FTTH, and long-haul telecom. Get factory price, detailed PDF ...

GN25L99 is a combined a 2.5Gbps DML Driver and 1.25Gbps burst mode limiting amplifier for gigabit passive optical network (GPON) optical line terminal (OLT) applications. The laser driver provides ...

The NEL NLK1551SSC directly-modulated laser (DML) is a cost-effective solution for 10 Gb/s digital transmission of up to 50 km using traditional intra-city fiber links.

As a professional in the telecommunications field, I understand the need for reliable and efficient networking solutions. That's why I'm excited to offer our Optical Router that not only enhances your ...

Description The NEL NLK1551SSC directly-modulated laser (DML) is a cost-effective solution for 10Gb/s digital transmission of up to 50km using traditional intra-city fiber links. The package contains a high ...

Featuring a single +12V DC power supply and a SMA RF input connector, this module is easy to operate and integrate. The module can be controlled remotely via the RS485 interface. Wavelength other ...

GIGALIGHT 100G QSFP28 LR4 optical modules are used for long-distance transmission in the datacom or telecom field and are compliant with IEEE 802.3ba 100GBASE-LR4 Ethernet transmission ...

Discover a range of high-performance routers designed for optimal fiber optic internet connections, offering enhanced speed, reliable signal strength, and seamless data transmission. These devices ...
